- **About Us**

An advertisement for Rock N Block Artificial Turf. The top and bottom of the ad are bordered by a green grass texture. The central image shows a worker in a blue long-sleeved shirt and jeans kneeling on a concrete surface, installing a roll of artificial turf. Overlaid on the image is the text "ARTIFICIAL GRASS INSTALLATION DENVER: TRANSFORM YOUR OUTDOOR SPACE WITH QUALITY AND STYLE" in large, bold, white capital letters with a black outline. In the top right corner of the image area is the "ROCK N BLOCK TURF N HARDSCAPES" logo. At the bottom, a white banner contains the text "ARTIFICIAL TURF", "Las Vegas • San Diego • Denver • Utah", and the website "www.rocknblocklandscape.com".

high durability. It can help prevent mud and dirt from being tracked indoors **Las Vegas backyard turf solutions** Astro turf. However, it's necessary to delve deeper into the durability of artificial turf when exposed to Las Vegas's unique environmental conditions.

The key factor contributing to the popularity of artificial turf among Las Vegas's sports field managers is its resilience against wear and tear. Unlike natural grass which can get worn out quickly under continuous use, especially in areas with harsh climates like Las Vegas, artificial turf stands up well against constant usage. It maintains its lush green appearance even after extended periods of play, making it an ideal choice for sports fields that host frequent games or practices.

Furthermore, one significant advantage of using artificial turf in a place like Las Vegas is its ability to withstand extreme weather conditions. Natural grass struggles in the face of intense heat and limited rainfall- typical characteristics of desert climates like that of Las Vegas. In contrast, artificial turf doesn't require watering nor does it wilt under scorching sun rays; rather it remains uniformly green throughout the year.

However, while analyzing the durability aspect of artificial turfs for sports fields in Las Vegas we cannot overlook potential demerits. Too much exposure to sunlight may cause certain types of synthetic fibers used in these turfs to degrade over time resulting in color fading or breaking down at fiber junctions.

Moreover, despite being largely maintenance-free compared to natural grass fields; cleaning spills or removing debris from synthetic turfs can be challenging sometimes which might affect their longevity adversely if not properly addressed.

To sum up, while there are some concerns regarding the durability of artificial turf under extreme conditions such as those seen in Las Vegas; overall they seem relatively minor when compared to the advantages. Its ability to withstand heavy usage and extreme weather conditions coupled with low maintenance requirements make artificial turf a preferable option for sports fields in Las Vegas.

However, advances in technology and better understanding of material science can further enhance the durability of artificial turfs. It is crucial that continual research be conducted to improve these synthetic surfaces so they may provide a safe, reliable and durable alternative to natural grass in areas like Las Vegas where such characteristics are highly valued due to climatic constraints.

In conclusion, the analysis of the durability of artificial turf for sports fields in Las Vegas reveals that it is indeed a feasible option considering its resistance against wear and tear as well as harsh weather conditions. However, continued efforts towards improving its longevity will only solidify its position as a preferred choice for sports fields in Las Vegas.

Impact of Artificial Turf on Sporting Events in Las Vegas —

Impact of Artificial Turf on Sporting Events in Las Vegas

Title: The Impact of Artificial Turf on Sporting Events in Las Vegas: A Focus on Durable Turf for Sports Fields

Artificial turf has gradually become a staple in various sporting events across the globe. Owing to its numerous advantages, many cities have adopted this innovative solution for their sports fields. One such city is Las Vegas, where artificial turf's impact on sporting events has been tremendously positive and transformative.

Las Vegas, known as a bustling hub for entertainment, is also home to several professional sports teams and boasts some of the most impressive sports fields in the country. With scorching temperatures that can reach over 100 degrees during summer, maintaining natural grass fields becomes an arduous task. This challenge led to the introduction of artificial turf - a durable and cost-effective solution that could withstand extreme weather conditions.

One of the most noticeable impacts artificial grass had was its contribution to player performance and safety. Before its arrival, players often complained about hard surfaces leading to injuries and overall discomfort during games. However, with technology advancements, today's synthetic turfs offer cushioning effects similar to natural grass reducing risk of injuries while ensuring optimum performance levels.

The durability of artificial turf is another significant advantage particularly relevant to Las Vegas' harsh climate. Unlike natural grass which requires frequent watering, mowing and fertilizing, artificial turfs are built to last with minimal maintenance required over time. They remain green all year round regardless of weather conditions making them ideal for continuous usage throughout different seasons without any degradation in quality.

Moreover, water conservation has also been a critical factor driving the adoption of artificial turfs in Las Vegas - a region grappling with water scarcity issues due to its desert location. According to studies by Synthetic Turf Council (STC), one square foot of synthetic turf can save up to 55 gallons of water per year - an undeniable benefit considering Las Vegas' ongoing efforts towards sustainability.

However it's not just about functionality, but also aesthetics. Artificial turfs provide a uniform and vibrant green look, enhancing the visual appeal of sports fields. This has proven to be particularly beneficial for televised events, as it enhances viewer experience creating a visually appealing backdrop for players and spectators alike.

In conclusion, the impact of artificial turf on sporting events in Las Vegas has been profound

and multifaceted. It has not only provided a durable solution to address the city's unique climatic challenges but also contributed to improved player performance, water conservation efforts and enhanced aesthetic appeal of sports fields. As technology continues to evolve, we can expect artificial turf to play an even more pivotal role in shaping the future of sporting events in Las Vegas and beyond.

Maintenance and Longevity of Durable Artificial Turf for Sports Fields

Maintenance and Longevity of Durable Artificial Turf for Sports Fields

Title: Maintenance and Longevity of Durable Artificial Turf for Sports Fields in Las Vegas

In the bustling city of Las Vegas, maintaining a vibrant sports culture is a significant priority. For that reason, investing in durable artificial turf for sports fields has become an essential aspect of fostering this cultural attribute. With rising concerns about water conservation, shifting from natural grass to artificial turf has emerged as a viable solution due to its minimal watering requirements. This essay will delve into the maintenance and longevity aspects of durable artificial turf for sports fields in Las Vegas.

To start with, understanding the specifics of artificial turf maintenance is crucial. Unlike regular grass which requires frequent watering, mowing and fertilizing, artificial turf demands less attention. The primary maintenance activities entail removing debris using leaf blowers or specialized vacuums and keeping the surface clean by hosing it down periodically. In addition, grooming the field occasionally helps maintain its aesthetic appeal while ensuring even usage across all parts.

Despite the reduced demand for upkeep compared to natural grass, consistent care is paramount to ensure long-lasting performance of the synthetic turf. High traffic areas may display signs of wear over time; hence proactive measures such as cross brushing can help prevent matting and enhance durability.

However, even with good care practices in place, it is important to acknowledge that every product has a lifespan – including artificial turf. On average, well-maintained synthetic turfs can last around 15-20 years depending on factors like quality of materials used during installation and intensity of use.

In terms of environmental impact also known as sustainability factor - one major benefit lies in water conservation especially considering Las Vegas' arid climate condition where water shortage is a perennial issue. Another advantage comes from reducing carbon emissions owing to elimination of mowing thus contributing towards building an environmentally-friendly sports ecosystem.

From a financial perspective too, despite higher upfront cost compared with natural grass pitches; over time savings accrue from lower water bills and minimal maintenance costs. The longevity of artificial turf coupled with these cost savings make it a wise investment for sports field owners.

In conclusion, the adoption of artificial turf in Las Vegas' sports fields is an innovative solution that

addresses environmental concerns while ensuring optimal playing conditions. As we continue to enhance our understanding about its care requirements, we can maximize its lifespan and enjoy the numerous benefits it offers. Artificial turf has proven to be not only a durable option but also a sustainable choice that aligns well with the city's water conservation efforts and commitment towards fostering an active sports culture.

Case Studies: Successful Use of Durable Turf in Las Vegas Sports Fields

Case Studies: Successful Use of Durable Turf in Las Vegas Sports Fields

Title: Case Studies: Successful Use of Durable Turf in Las Vegas Sports Fields

Las Vegas, the city known for its vibrant nightlife and grand casinos, is also home to an array of sports fields. These fields are often subjected to intensive use and extreme weather conditions. The need for a durable, sustainable solution led to the introduction of durable turf in these grounds.

One such case study that demonstrates the successful implementation of durable turf is at the Allegiant Stadium, colloquially referred to as "The Death Star". This 65,000-seat venue, home to the Las Vegas Raiders NFL team, opted for durable turf due to its performance consistency and resilience against high traffic wear-and-tear.

Durable turf offers a consistent playing surface regardless of weather conditions. Its ability to withstand significant foot traffic without degrading makes it ideal for larger venues like Allegiant Stadium where games are played throughout the year. Moreover, this type of turf requires minimal maintenance compared with natural grass which can be vulnerable to disease and pests.

Another commendable example is Cashman Field where Las Vegas Lights FC plays its games. Here too, durable turf was employed given its high durability factor coupled with low maintenance needs. It showed exceptional resistance to heat stress - a crucial requirement considering Las Vegas' arid climate.

Yet another testament is the Bettye Wilson Soccer complex which has successfully used durable turfs across multiple fields since 2008. Over time they have reported significant cost savings on water bills due to reduced irrigation needs and less spending on lawn care services such as fertilization or pest control.

Beyond sports fields, several golf courses in Las Vegas have also adopted this technology seeing its success elsewhere. The Desert Pines Golf Club stands out among them who decided on installing durable turfs after witnessing their long-term benefits including fewer costs associated with upkeep and a greener course throughout the year.

The trend towards using durable turfs in sports fields has been gaining momentum in Las Vegas. It is a testament to the turf's ability to withstand harsh conditions while requiring minimal maintenance, making it an economically sound choice. As these case studies continue to demonstrate the benefits of durable turf, it is expected that more sports fields and golf courses across the region will make the switch.

In conclusion, these case studies from Las Vegas exemplify how durable turfs have transformed sports fields into resilient and sustainable arenas. The move towards adopting this technology is not just about aesthetics or playability but also about cost-effectiveness and environmental sustainability. It's safe to say that durable turf has indeed struck a home run in Las Vegas!

About Landscape design

This article **needs additional citations for verification**. Please help **improve this article** by **adding citations to reliable sources**. Unsourced material may be challenged and removed.

Find sources: "Landscape design" – news · newspapers · books · scholar · JSTOR (May 2016) (Learn how and when to remove this message)

Central Park in **Manhattan**, the first landscaped **urban park** in the United States

Landscape design is an independent profession and a design and art tradition, practiced by landscape designers, combining **nature** and **culture**. In contemporary practice, landscape design bridges the space between **landscape architecture** and **garden design**.^[1]

Design scope

[**edit**]

Landscape design focuses on both the integrated master **landscape planning** of a property and the specific **garden design** of landscape elements and plants within it. The practical, **aesthetic**, **horticultural**, and environmental **sustainability** are also components of landscape design, which is often divided into **hardscape** design and **softscape** design. Landscape designers often collaborate with related disciplines such as **architecture**, **civil engineering**, **surveying**, **landscape contracting**, and artisan specialties.

Design projects may involve two different professional roles: landscape design and landscape architecture.

- Landscape design typically involves artistic composition and artisanship, horticultural finesse and expertise, and emphasis on detailed site involvement from conceptual stages through to final construction.
- Landscape architecture focuses more on urban planning, city and regional parks, civic and corporate landscapes, large scale interdisciplinary projects, and delegation to contractors after completing designs.

There can be a significant overlap of talent and skill between the two roles, depending on the education, licensing, and experience of the professional. Both landscape designers and landscape architects practice landscape design. **[2]**

Design approach

[edit]

Autumn colours at **Stourhead** gardens

The landscape design phase consists of research, gathering ideas, and setting a plan. Design factors include objective qualities such as: climate and microclimates; topography and orientation, site drainage and **groundwater recharge**; municipal and resource building codes; soils and irrigation; human and vehicular access and circulation; recreational amenities (i.e., sports and water); furnishings and lighting; **native plant** habitat botany when present; property safety and security; **construction detailing**; and other measurable considerations.

Design factors also include subjective qualities such as **genius loci** (the special site qualities to emphasize); client's needs and preferences; desirable plants and elements to retain on site, modify, or replace, and that may be available for **borrowed scenery** from beyond; artistic composition from perspectives of both looking upon and observing from within; spatial development and definition – using lines, sense of scale, and balance and symmetry; plant palettes; and artistic **focal points** for enjoyment. There are innumerable other design factors and considerations brought to the complex process of designing a garden that is beautiful, well-functioning, and that thrives over time.

The up-and-coming practice of online landscape design allows professional landscapers to remotely design and plan sites through manipulation of two-dimensional images without ever physically visiting the location. Due to the frequent lack of non-visual, supplementary data such as soil assessments and pH tests, online landscaping necessarily must focus on incorporating only plants which are tolerant across many diverse soil conditions.

Training

[edit]

André Le Nôtre

Historically, landscape designers trained by apprenticing—such as **André Le Nôtre**, who apprenticed with his father before designing the **Gardens of Versailles**—to accomplished masters in the field, with the titular name varying and reputation paramount for a career. The professional section of garden designers in Europe and the Americas went by the name "Landscape Gardener". In the 1890s, the distinct classification of **landscape architect** was created, with educational and licensing test requirements for using the title legally. **Beatrix Farrand**, the sole woman in the founding group, refused the title preferring Landscape Gardener. Matching the client and technical needs of a project, and the appropriate practitioner with talent, legal qualifications, and experienced skills, surmounts title nomenclature.^[*citation needed*]

Institutional education in landscape design appeared in the early 20th century. Over time it became available at various levels. Ornamental horticulture programs with design components are offered at community college and universities within **schools of agriculture** or horticulture, with some beginning to offer garden or landscape design certificates and degrees. Departments of landscape architecture are located within university schools of architecture or **environmental design**, with undergraduate and graduate degrees offered. Specialties and minors are available in horticultural botany, **horticulture**, **natural resources**, **landscape engineering**, **construction management**, **fine** and **applied arts**, and **landscape design history**. Traditionally, hand-drawn drawings documented the design and position of features for construction, but **Landscape design software** is frequently used now.^[*citation needed*]

Other routes of training are through informal apprenticeships with practicing landscape designers, landscape architects, landscape contractors, gardeners, nurseries and garden centers, and docent programs at botanical and public gardens. Since the landscape designer title does not have a college degree or licensing requirements to be used, there is a very wide range of sophistication, aesthetic talent, technical expertise, and specialty strengths to be responsibly matched with specific client and project requirements.^[*citation needed*]

Gardening

[*edit*]

Many landscape designers have an interest and involvement with **gardening**, personally or professionally. Gardens are dynamic and not static after construction and planting are completed, and so in some ways are "never done". Involvement with **landscape management** and direction of the ongoing garden direction, evolution, and care depend on the professional's and client's needs and inclinations. As with the other interrelated landscape disciplines, there can be an overlap of services offered under the titles of landscape designer or professional gardener.^[2]

Paradise is an **unincorporated town**^[2] and **census-designated place** (CDP) in **Clark County, Nevada**, United States, adjacent to the city of **Las Vegas**. It was formed on December 8, 1950. Its population was 191,238 at the 2020 census, making it the fifth-most-populous CDP in the United States; if it were an incorporated city, it would be the fifth-largest in Nevada.^[3] As an unincorporated town, it is governed by the **Clark County Commission** with input from the Paradise Town Advisory Board.

Paradise contains **Harry Reid International Airport**, the **University of Nevada, Las Vegas** (UNLV), the majority of the **Las Vegas Strip**, and most of the tourist attractions in the Las Vegas area (excluding **downtown**). However, all Paradise addresses, as well as other unincorporated areas in the **Las Vegas Valley**, have "Las Vegas" addresses.^[4]

History

^[edit]

The southern part of the **Las Vegas Valley** was referred to as Paradise Valley as early as 1910, owing to a high **water table** that made the land particularly fertile for farming.^[5]^[6] County commissioners established a Paradise school district in 1914.^[7]

Neighborhoods on the east side of Paradise

In 1950, mayor Ernie Cragin of Las Vegas sought to annex the **Las Vegas Strip**, which was unincorporated territory, in order to expand the city's tax base to fund his ambitious building agenda and pay down the city's rising debt.^[8] A group of casino executives, led by **Gus Greenbaum** of the **Flamingo**, lobbied the county commissioners for town status, which would prevent the city from annexing the land without the commission's approval.^[8] The commission voted to create the unincorporated town of Paradise on December 8, 1950.^[9]^[10] The town

encompassed a strip one mile (1.6 km) wide and four miles (6.4 km) long, from the southern city limits of Las Vegas to just south of the Flamingo.^[10] The town board initially consisted of five casino managers, chaired by Greenbaum.^{[10][11]}

A month after its establishment, the town was expanded to include the residential areas of Paradise Valley, giving it a total area of 54 square miles (140 km²).^[11] Months later, however, it was reported that county officials had determined that the town had not been properly established, because the petition for the town's formation had an insufficient number of signatures and because it had violated a state law forbidding formation of a town spanning multiple school districts.^[12] On August 20, 1951, county commissioners accepted petitions to create two new towns covering the area of the putative town.^[13] Town "A" of Paradise included the areas that lay within a Las Vegas school district, extending from the city limits to a point one mile south, while Town "B" included the areas within the Paradise school district.^[12]

In 1953, Town A was renamed as **Winchester**, and Town B became known simply as Paradise.^[14]

In 1975, Nevada enacted a law that would have incorporated Paradise (along with **Sunrise Manor** and Winchester) into the City of Las Vegas.^[15] Before it could take effect, however, the bill was struck down as unconstitutional by the **Nevada Supreme Court**.^{[16][17]}

Geography

^[edit]

According to the **United States Census Bureau**, the **census-designated place** (CDP) of Paradise (which may not coincide exactly with the town boundaries) has a total area of 46.7 square miles (121 km²), all of it land.

The official town boundaries are bordered by **Desert Inn Road** to the north, **Nellis Boulevard** to the east, **Sunset Road** to the south and **Decatur Boulevard** to the west. There is a southern finger between Bermuda Road and **Eastern Avenue** south to Silverado Ranch Boulevard. South of **Russell Road**, the eastern border stairsteps on a rough 45-degree angle toward the corner of Eastern and Robindale Road, and there is an additional finger surrounding **Interstate 215** east to **St. Rose Parkway**.^[18]

Demographics

^[edit]

Historical population			
Census	Pop.	Note	%±
1970	24,477	—	
1980	84,818		246.5%

1990	124,682	47.0%
2000	186,070	49.2%
2010	223,167	19.9%
2020	191,238	?14.3%

source:[19]

At the **census** of 2010,[20] there were 223,167 people residing in Paradise. The racial makeup was 59.8% **White**, 10.0% **African American**, 0.8% **Native American**, 9.5% **Asian**, 1.0% **Pacific Islander**, and 5.5% from two or more races. **Hispanic** or **Latino** residents made up 31.2% of the population, and 46.3% of the population was **non-Hispanic White**.

As of the **census**[21] of 2000, there were 186,070 people, 77,209 households, and 43,314 families residing in the CDP. The population density was 3,947.3 inhabitants per square mile (1,524.1/km²). There were 85,398 housing units at an average density of 1,811.6 per square mile (699.5/km²). The racial makeup of the CDP was 72.51% **White**, 6.59% **African American**, 0.77% **Native American**, 6.52% **Asian**, 0.59% **Pacific Islander**, 8.37% from **other races**, and 4.65% from two or more races. **Hispanic** or **Latino** of any race were 23.47% of the population.

There were 77,209 households, out of which 24.6% had children under the age of 18 living with them, 39.7% were **married couples** living together, 10.5% had a female householder with no husband present, and 43.9% were non-families. 31.9% of all households were made up of individuals, and 7.5% had someone living alone who was 65 years of age or older. The average household size was 2.39 and the average family size was 3.04.

In the CDP, 21.2% was under the age of 18, 10.8% from 18 to 24, 33.3% from 25 to 44, 23.6% from 45 to 64, and 11.1% was 65 years of age or older. The median age was 35 years. For every 100 females, there were 109.1 males. For every 100 females age 18 and over, there were 110.0 males.

The median income for a household in the CDP was \$39,376, and the median income for a family was \$46,578. Males had a median income of \$31,412 versus \$25,898 for females. The **per capita income** for the CDP was \$21,258. 11.8% of the population and 8.1% of families were below the **poverty line**. 15.3% of those under the age of 18 and 7.6% of those 65 and older were living below the poverty line.

Allegiant Stadium

Paradise is home to Las Vegas's three major league sports teams: the **Vegas Golden Knights** of the **National Hockey League** (NHL), which play at **T-Mobile Arena**, the **Las Vegas Raiders** of the **National Football League** (NFL) which play at **Allegiant Stadium**, and the **Las Vegas Aces** of the **WNBA** which play at **Michelob Ultra Arena**. **Super Bowl LVIII** in 2024 was played at Allegiant Stadium.^[25] Paradise will be the future home of the **Oakland Athletics** of **Major League Baseball** (MLB)^{[26][27]} at **a new stadium**.

As UNLV is located in Paradise, most of its various teams play in the township. The **UNLV Rebels football** program plays at Allegiant Stadium, and the **Runnin' Rebels** and **Lady Rebels** play at **Thomas & Mack Center** and in the **Cox Pavilion** respectively.

Also, since 2004, the **Las Vegas Summer League**, organized by the **National Basketball Association** (NBA), is played in the Thomas & Mack Center and in the Cox Pavilion.^[28]

Paradise has hosted the **Formula One Las Vegas Grand Prix**, held on a **street circuit** including part of the Las Vegas Strip, since **2023**.^[29]

About Landscaping

"Landscapers" redirects here. For the 2021 true crime TV series, see **Landscapers (TV series)**.

Landscaping an elementary school courtyard in the city of Kuching

Landscaping refers to any activity that modifies the visible features of an area of land, including the following:

1. **Living elements**, such as **flora** or **fauna**; or what is commonly called **gardening**, the art and craft of growing plants with a goal of creating a beauty within the **landscape**.
2. Natural **abiotic elements**, such as **landforms**, **terrain** shape and elevation, or **bodies of water**.
3. Abstract elements, such as the **weather** and lighting conditions.

Landscaping requires a certain understanding of **horticulture** and artistic design, but is not limited to plants and horticulture. Sculpting land to enhance usability (patio, walkways, ponds, water features) are also examples of landscaping being used. When intended as purely an aesthetic change, the term **Ornamental Landscaping** is used.[1]

Often, designers refer to landscaping as an extension of rooms in your house (each one has a function). Outdoor spaces have a vast amount of flexibility as far as materials and function. It is often said the only limitation to outdoor space is one's imagination.

Understanding the land

[edit]

Construction requires both study and observation, and the process varies in different parts of the world. Landscaping varies according to different **regions**. [2] Therefore, normally local natural experts are recommended if it is done for the first time. Understanding of the site is one of the chief essentials for successful landscaping. [3] Different natural features and phenomena, like the position of the sun, terrain, **topography**, **soil qualities**, prevailing winds, depth of the **frost line**, and the system of **native flora** and fauna must be taken into account. [4] Sometimes the land is not fit for landscaping. In order to landscape it, the land must be reshaped to direct water for appropriate drainage. This reshaping of land is called **grading**. [4] Sometimes in large landscaping projects like, parks, sports fields and reserves soil may need to be improved by adding nutrients for growth of plants or turf, this process is called soil amelioration. [5]

Removal of earth from the land is called cutting while when earth is added to the slope, it is called filling. Sometimes the grading process may involve removal of excessive waste (**landfills**), **soil** and rocks, so designers should take into account while in the planning stage. [6][7]

Additional information

[edit]

At the start, the landscaping contractor issues a statement which is a rough design and layout of what could be done with the land in order to achieve the desired outcome. [4] Different pencils are required to make graphics of the picture. Landscaping has become more technological than natural, as few projects begin without **bulldozers**, **lawnmowers**, or **chainsaws**. [2] Different areas have different qualities of plants. When growing new grass, it should ideally be done in the spring and the fall seasons to maximize growth and to minimize the spread of weeds. It is generally agreed that organic or chemical **fertilizers** are required for good plant growth. Some landscapers prefer to use mix **gravel** with rocks of varying sizes to add interest in large areas. [8]

Pahrump welcome sign

Pahrump (/pəˈrʌmp/ *pə-**RUMP***) is an **unincorporated town** located at the southernmost tip of **Nye County, Nevada**, United States,^[3] about 50 miles (80 km) west of **Las Vegas** (roughly an hour away by driving distance). Pahrump lies adjacent to the Nevada–**California** border and the area had a population of 44,738 as of the 2020 census.

History

[[edit](#)]

Pahrump was originally inhabited by the **Southern Paiute**. It was slowly inhabited by settlers in the late 19th century. They reportedly chose the name for Pahrump after the original **Southern Paiute** name *Pah-Rimpi*, or "Water Rock," so named because of the abundant **artesian wells** in the valley. Because of the artesian wells, the new inhabitants of **Pahrump Valley** began a number of large **ranch**-style holdings, mostly over 1,000 acres (400 ha) in size. On the ranches, **alfalfa** and **cotton** were grown, and **livestock** were raised.

View of the mountains from town

Until the 1960s, Pahrump had no **telephone** service except a radio transmitter phone in a phone booth next to the small market, and there were no paved roads in or out of the Pahrump Valley. As **Las Vegas** grew, the Pahrump region also saw more real estate development and population growth. This led to the introduction of telephone service and the construction of a paved highway between Las Vegas and Pahrump during the late 1960s. Later, this road (**NV**

160) was extended from Pahrump northward to **US 95**, near **Amargosa Valley**. A second paved road (**NV 372**) was introduced that went from Pahrump to neighboring **Shoshone, California**, which provided a link to the **Death Valley** area, as well as a shorter route to those wishing to travel to **Los Angeles** or other areas in California. In the fifties and sixties, there was a two-room elementary school and the high school students went to Shoshone. In 1974, Pahrump's first high school, Pahrump Valley High School, was constructed.^[4]

Pahrump is an archetypal example of an **exurb** (a residential region beyond suburbs). Almost all significant agriculture has ended in the valley,^[5] and over the years the surface aquifers have been drained. Residential housing growth in Pahrump was partly responsible for Nye County ranking among the fastest growing counties nationwide in 2005.^[6]

Las Vegas casino owner **Ted Binion** buried a large treasure of **silver** in a secret underground vault in Pahrump. In 1998, Binion died under suspicious circumstances, and one of the parties accused of murdering Binion was apprehended while digging up the vault in Pahrump. A book about the Binion murder trial (and Las Vegas poker) is ***Positively Fifth Street*** by **James McManus**.

On November 15, 2006, the Pahrump town board voted for an ordinance declaring English the official language of business, limiting the display of foreign flags, and denying housing assistance or other welfare benefits to illegal immigrants.^[6] A measure in the ordinance required an American flag to be displayed above any other flag, regardless of what organization, nation, or government it represented. County Sheriff Tony DeMeo said he would not attempt to enforce the ordinance,^[6] which was repealed four months later because of bad publicity.^[7]

On November 4, 2017, **Koenigsegg** Automotive AB achieved the **highest top speed of a production car** ever, surpassing the **Bugatti Veyron**. The **Koenigsegg Agera RS** reached a top speed of 277.9 mph (447.2 km/h) on **Nevada State Route 160** in the Pahrump region.^{[8][9]}

Geography and climate

^[edit]

According to the **United States Census Bureau**, the **census-designated place** of Pahrump has a total area of 297.9 sq mi (771.5 km²), all of which is land. By area, it is the largest CDP in the contiguous United States, although it ranks only eleventh nationally, since the largest ten are all in Alaska. The area lies in the **Mojave Desert**.

Night aerial view of Pahrump from the southwest, with the downtown intersection of Nevada routes **160** and **372** at the bright center

Summers in Pahrump are generally very hot and dry, with occasional pushes of monsoonal moisture beginning in early July. Being at a similar elevation to Las Vegas, daytime highs in summer average within a few degrees lower than that of Las Vegas. Record highs are similar between the two cities as well. A typical day during June through August brings temperatures around 100 °F (38 °C), and occasionally 110 °F (43 °C). Nighttime temperatures, however, are noticeably cooler. This is due to the lack of an **urban heat island** in Pahrump, allowing for intense radiative cooling after sundown. As a result, summer nights are pleasantly warm, bottoming out in the mid-60s or 70s °F (around 20 °C). Pahrump's location in a valley leads to large diurnal temperature ranges, typically 30 °F (17 °C) but occasionally 40 °F (22 °C). By late August and early September, the sweltering summer heat noticeably tempers down. September is the gateway to fall, which brings very pleasant weather. October highs are generally 80 °F (27 °C) and nighttime temperatures in the 50s °F (low teens °C). Due to its elevation, Pahrump is protected from the searing summer temperatures experienced in the nearby **Death Valley**.

Like other locations in the Mojave desert, winters are typically mild, with occasional pushes of cold air from the north. Daytime highs average from the mid-50s and 60s °F (10s °C), but low temperatures hover around freezing for most nights between December and February. Spring brings pleasantly warm temperatures and cool evenings. Like other locations in the Mojave desert, this is the windiest time of year. Snowfall is rare in Pahrump, but there is generally at least one snow day per year.

Climate data for Pahrump, Nevada (1991–2020 normals, extremes 1914–1926, 1949–1952, 1958–present)

Demographics

[edit]

Historical population

Census	Pop.	Note	%±
1990	7,424	—	
2000	24,631		231.8%
2010	36,441		47.9%
2020	44,738		22.8%

U.S. Decennial Census[12]

As of the **census** of 2000,[13] there were 24,631 people, 10,153 households, and 7,127 families residing in the **census-designated place** (CDP) of Pahrump. The population density was 82.7 inhabitants per square mile (31.9/km²). There were 11,651 housing units at an average density of 39.1 per square mile (15.1/km²). The racial makeup of the CDP was 96.1% **White**, 0.1% **African American**, 1.1% **Native American**, 1.4% **Asian**, 0.37% **Pacific Islander**, 2.27% from **other races**, and 2.6% from two or more races. **Hispanic** or **Latino** of any race were 12.9% of the population.

There were 10,153 households, out of which 14.2% had children under the age of 18 living with them, 58.2% were **married couples** living together, 7.5% had a female householder with no husband present, and 29.8% were non-families. 23.5% of all households were made up of individuals, and 10.5% had someone living alone who was 65 years of age or older. The average household size was 2.42 and the average family size was 2.83.

In the CDP, the population was spread out, with 22.3% under the age of 18, 4.9% from 18 to 24, 10.6% from 25 to 44, 28.9% from 45 to 64, and 55.3% who were 65 years of age or older. The median age was 45 years. For every 100 females, there were 102.4 males. For every 100 females age 18 and over, there were 101.4 males.

The median income for a household in the CDP was \$34,860, and the median income for a family was \$39,812. Males had a median income of \$35,862 versus \$21,586 for females. The

per capita income for the CDP was \$17,708. About 7.3% of families and 10.7% of the population were below the **poverty line**, including 14.8% of those under age 18 and 7.0% of those age 65 or over. Nye County receives an unusually large 29 percent of its income from federal benefits which amounts to \$9,408 for each resident of the county.

Government

[**edit**]

Government offices for Pahrump

Pahrump has an unincorporated town status, with a limited government that manages land-use planning, recreation, and fire, while leaving most services to Nye County. In 2012, Pahrump voted to disband the Town Board form of government in favor of an advisory board under the County Commissioners. It was finalized in 2014 when the incumbent elected members' terms expired. The Town Board was disbanded as of January 2015.[14][15]

Gregory Hafen II (R) represents the 36th district for the **Nevada Assembly**.^[16]

Education

[**edit**]

Public education in Pahrump is administered by the **Nye County School District**.^[17] The district headquarters is in Pahrump.^[18]

Pahrump has a **public library**.^[19]

The county is in the service area of **Great Basin College**.^[20]

Economy

[**edit**]

Notable businesses in the area include the **Spring Mountain Motor Sports Ranch**. **Golden Entertainment** operates three casinos in Pahrump.

Two legal **brothels**, **Sheri's Ranch** and **Chicken Ranch**, are located in Pahrump. Due to their proximity to **Las Vegas**, they tend to be more expensive than other legal brothels in Nevada.

Media

[[edit](#)]

Pahrump is served by Prime-TV affiliate **KPVM-TV 25**^{[21][22]} It has ten digital channels 25.1 (PrimeTV), 25.2 (**thisTV**), 25.3 **America's Voice**, 25.4 **OANN**, 25.5 **Shop LC**, 25.6 **Home Shopping Network**, 25.7 conservative talk radio, 25.8 country, 25.9 **Nuestra Vision**, and 25.10 **Fun Roads**.^{[23][24]} Pahrump is also home to **KACP 103.1 FM** which airs a **country music** format.^[25]

Transportation

[[edit](#)]

Pahrump Valley Transportation is the only public transportation in Pahrump. However, there is also VetRANS, a transportation service for veterans. Both services run by appointment, and offer transport to certain destinations in Las Vegas. Salt Lake Express serves Pahrump on its bus route from Las Vegas to Reno. **Eastern Sierra Transit Authority** provides bus service from Pahrump to **Tecopa, California**.^[26]

Residents, and those visiting Pahrump, utilize **McCarran International Airport** in the Las Vegas area, approximately 60 miles east of Pahrump. A private airport, **Calvada Meadows Airport**, also serves Pahrump, however, aircraft must request permission before landing at this small airport. **Enterprise Rent-A-Car** operates a local branch for vehicle rental needs. Pahrump has taxi service operating 24 hours a day.

Notable residents

[[edit](#)]

Pahrump was the hometown of author and radio personality **Art Bell**.^[27] He was known for founding **Coast to Coast AM**, an overnight radio talk show mainly about paranormal subjects, conspiracies, and other oddities that he broadcast from his home studio. At one time, Bell owned **KNYE**, the local radio station located in Pahrump. After the death of his wife Ramona, Bell remarried and relocated to the Philippines. On the December 28, 2006, broadcast of *Coast to Coast AM*, Bell announced he had returned to Pahrump, but he later returned to the Philippines, where he resided until 2011, when he again returned to Pahrump. Bell hosted **Art Bell's Dark Matter**, also dealing with paranormal subject matter, which aired on SiriusXM, from his home in Pahrump. In July 2015, Art Bell returned to the airwaves with a new show, *Midnight in the Desert*, which aired weeknights in a three-hour time slot.^[28] The show covered much of the same material as *Coast to Coast AM*. Bell retired from the show in December 2015. Bell

died on April 13, 2018, in Pahrump.

Michael Jackson purchased a home in the area in 2008, where he briefly had a home **studio** and **home schooled** his three children.[29]

Pahrump is the home of **Ronald Wayne**, the third co-founder of **Apple Computer** along with **Steve Jobs** and **Steve Wozniak**. Wayne relinquished his equity in Apple for \$800 in 1976; [30] [31] he now lives a quiet lifestyle in Pahrump, selling **stamps** and rare **coins**. [32]

Retired actress **June Kenney** lived in Pahrump from 2010 to her death in 2021. [33]

Musical group **Escape the Fate** was founded in, and originally from, Pahrump, [34][35] before the band relocated to Las Vegas.

Infamous "Hollywood madam" **Heidi Fleiss** moved to Pahrump in 2005. [36]

Melvin Dummar, who claimed to have saved the life of **Howard Hughes** and who was named in a disputed will as Hughes's main beneficiary, lived for a while in Pahrump and died there in 2018. [37]

1992 Libertarian Vice Presidential candidate **Nancy Lord** lived in Pahrump for a number of years.

Although **brothel** owner **Dennis Hof** died in nearby **Crystal**, he referred to himself in political ads as "The Trump of Pahrump," a sobriquet he credited to **Donald Trump** advisor **Roger Stone** (an early supporter of Hof). [38] Hof was elected posthumously to a seat in the **Nevada Assembly** in 2018. A group of county commissioners within the legislative district was empowered to appoint a successor; Pahrump utility general manager **Gregory Hafen II** won appointment to the seat.

Libertarian writer and filmmaker **J. Neil Schulman**, author of ***Alongside Night*** (1978) and writer/producer/director of the indie film ***Alongside Night***, [39] lived in Pahrump. Schulman was the first to produce a film that featured Pahrump, in the script of ***Lady Magdalene's***, which starred **Nichelle Nichols** as the owner of the title **brothel**.

In popular culture

[edit]

- In the film ***Mars Attacks!***, Martians land in Pahrump and announce they have "come in peace", but soon kill most of the humans gathered there. [40][41]
- Pahrump was featured in ***Studio 60 on the Sunset Strip*** in a two-part episode titled "Nevada Day." Part One aired November 6, 2006, and Part Two aired a week later on November 13. The scenes, however, were set only in the town jail and a small diner across the street, and the town itself was not featured, implying that Pahrump is much

smaller than it actually is. [*citation needed*]

- The TV series ***Get Shorty*** is partly set in Pahrump.[42] The city is the home town of main character Miles Daly, played by **Chris O'Dowd**.
- The TV series ***Small Town News: KPVM Pahrump*** is about the only TV station in Pahrump.[22][43]
- Pahrump was featured in seasons 2, 3, and 4 of the TV series ***Live PD*** produced by **A&E (TV network)**.^{[44][45]}
- In ***Harvey Birdman: Attorney General***, **Peter Potamus** runs a radio show, **HippoWars**, on **KHPO** broadcasting out of Pahrump.
- Pahrump was briefly referenced in season 5 of **iZombie**.

Reviews for Rock N Block - Turf N Hardscapes

Jeanette Sanchez

(5)

Quality Work! Friendly and respectful individuals in all my interactions throughout the project. I had my yard renovated with new artificial turf, decorative rocks, and a few trees. It looks beautiful and everything was completed in a timely and efficient manner. Highly recommended (if it is in your budget).

Terry Lewis

(5)

Workers were great, no problem they did what was required, but the representative of your company misled me on what was to be done, I showed pictures from a competitor landscaper, representative stated he could bet there , , . price, but since it wasn't in contract, I was left with uncomplicated backyard , working with owner at present, so he's been outstanding working on this situation, as amount of rock was way off and the owner did increase the amount substantially to finish the front yard. another landscaper under contract to finish the backyard. Would like to add a comment the

manger/owner of Las Vegas yard n block stands behind his words and helped me tremendously on finishing up the backyard,

Dawna OgleYohe

My initial contact was with Ray, whom did an excellent job giving me an estimate on what I wanted done in my small yard and walkway., the guys that came out and did the work were superior. They did an excellent job. I'm very pleased with this company. I will highly recommend them to family and friends, and I will be using them in the near future for other little projects.

Josh Bodell

(5)

Eric and team did an amazing job. They worked with me for months while I got HOA approval for the project. Once they began working they were great, going over everything in detail and making sure things were perfect. This project included wall repair, stucco and paint repair, paver and turf installation. Extremely satisfied with this experience.

D. Lopez

We recently had a very positive experience with Rock N Block for our fence replacement. The entire process went smoothly and exceeded our expectations. Harvey and his team were incredibly professional and communicative throughout the project providing much-needed assurance and peace of mind. The crew was punctual and maintained a diligent and respectful attitude that made the experience pleasant. The crew finished the project ahead of schedule, and the quality of their work is impressive; our new wall looks great! We recommend Rock N Block for any fencing needs and look forward to working with them again. Thank you, Harvey and crew, for a job well done!

Frequently Asked Questions

What makes artificial turf durable for sports fields in Las Vegas?

Artificial turfs durability comes from its high-quality synthetic materials designed to withstand heavy use, extreme temperatures, and require less maintenance than natural grass. It is UV resistant and doesnt fade under harsh sunlight, which is common in Las Vegas.

How does artificial turf handle the extreme heat of Las Vegas?

High-quality artificial turf is made with UV-resistant materials that prevent it from fading or being damaged by intense heat. Some turfs also feature a cooling technology that can reduce surface temperatures.

Is there any specific maintenance required for artificial turf in a hot desert city like Las Vegas?

Artificial turf requires less maintenance compared to natural grass. However, regular brushing to keep the blades upright and occasional rinsing to remove dust or small debris are recommended. Despite the high heat in Las Vegas, no special maintenance is needed due to the durability of the materials used.

How long does artificial turf last on sports fields in Las Vegas?

With proper installation and minimal maintenance, high-quality artificial turf can last anywhere between 15-20 years on sports fields regardless of weather conditions.

Are there any environmental benefits of using artificial turf for sports fields in places like Las Vegas?

Yes, artificial turf saves water - an important consideration in desert cities like Las Vegas where water supply can be limited. Additionally, it eliminates the need for harmful pesticides and fertilizers that are often used on traditional grass fields.
