About hybrid grass

This article is about grass reinforced with other material. For grass hybrids, see [Grass \(disambiguation\)](#).

Hybrid grass or reinforced natural grass is a product created by combining natural **lawn grass** with reinforcing **synthetic fibres**. It is used for stadiums[1] and training pitches used for **association football**,[2] **rugby**,[3] **gridiron football**[4] and **cricket**. [5] Reinforced natural grass can also be used for events and concerts. The synthetic fibres incorporated into the rootzone make the grass stronger and more resistant to damage.[6]

A first generation of hybrid grass appeared in the 1990s. Grass roots were allowed to intertwine with a mix of soil and synthetic fibres as they grew.[6] Three main methods exist to insert synthetic fibres in the root zone. The first is to inject fibres in the sand with a **tufting** machine.[7][8]

The second method is to mix fibres, **cork** and **sand** in an automated plant and to install it afterwards on the pitch. The system was created by a laboratory at the **Arts et Métiers ParisTech**. [9][10][11]

The third method is to put a **carpet** or mat with woven or tufted fibres on the surface, then to brush in sand or sand mixes to keep the fibres in an upright position and finally to seed grass mixtures on top. The natural grass roots through the mat and stabilizes the system. These systems are called carpet-based hybrid grass solutions.[12]

About landscape architecture

Stourhead in **Wiltshire**, England, designed by **Henry Hoare** (1705–1785), "the first landscape gardener, who showed in a single work, genius of the highest order"^[1]

Landscape architecture is the design of outdoor areas, **landmarks**, and structures to achieve environmental, social-behavioural, or aesthetic outcomes.^[2] It involves the systematic design and general engineering of various structures for construction and human use, investigation of existing social, ecological, and soil conditions and processes in the landscape, and the design of other interventions that will produce desired outcomes.

The scope of the profession is broad and can be subdivided into several sub-categories including professional or licensed landscape architects who are regulated by governmental agencies and possess the expertise to design a wide range of structures and landforms for human use; **landscape design** which is not a licensed profession; **site planning**; **stormwater management**; **erosion control**; **environmental restoration**; public realm, parks, recreation and **urban planning**; visual resource management; green infrastructure planning and provision; and private estate and residence landscape master planning and design; all at varying scales of design, planning and management. A practitioner in the profession of landscape architecture may be called a **landscape architect**; however, in jurisdictions where professional licenses are required it is often only those who possess a landscape architect license who can be called a landscape architect.

Definition of landscape architecture

[\[edit\]](#)

A canal design focused on esthetical landscape

architecture in **Stockholm**, Sweden.

A river with concrete walls like those of a **flood control channel**, a historic flood-control measure using **landscape engineering** in **Houston**, Texas. Such channelling, intended to be strictly functional, may make flooding worse, by speeding the flow instead of spreading the pulse of floodwater.[3][4][5]

Modern landscape architecture is a multi-disciplinary field, incorporating aspects of **urban design**, **architecture**, **geography**, **ecology**, **civil engineering**, **structural engineering**, **horticulture**, **environmental psychology**, **industrial design**, **soil sciences**, **botany**, and **fine arts**. The activities of a landscape architect can range from the creation of public parks and parkways to site planning for campuses and corporate office parks; from the design of residential estates to the design of civil **infrastructure**; and from the management of large **wilderness** areas to **reclamation** of degraded landscapes such as mines or **landfills**. Landscape architects work on structures and external spaces in the landscape aspect of the design – large or small, **urban**, **suburban** and **rural**, and with "hard" (built) and "soft" (planted) materials, while integrating ecological **sustainability**.

The most valuable contribution can be made at the first stage of a project to generate ideas with technical understanding and creative flair for the design, organization, and use of spaces. The landscape architect can conceive the overall concept and prepare the master plan, from which detailed design drawings and technical specifications are prepared. They can also review proposals to authorize and supervise contracts for the construction work. Other skills include preparing design impact assessments, conducting environmental assessments and audits, and serving as an expert witness at inquiries on **land use** issues. The majority of their time will most likely be spent inside an office building designing and preparing models for clients.[**citation needed**]

History

[**edit**]

Orangery at the Palace of Versailles, outside Paris

Main article: [History of landscape architecture](#)

For the period before 1800, the history of landscape gardening (later called landscape architecture) is largely that of master planning and [garden design](#) for [manor houses](#), [palaces](#) and royal properties. An example is the extensive work by [André Le Nôtre](#) for King [Louis XIV of France](#) on the [Gardens of Versailles](#). The first person to write of *making* a landscape was [Joseph Addison](#) in 1712. The term landscape architecture was invented by [Gilbert Laing Meason](#) in 1828, and [John Claudius Loudon](#) (1783–1843) was instrumental in the adoption of the term landscape architecture by the modern profession. He took up the term from Meason and gave it publicity in his Encyclopedias and in his 1840 book on the *Landscape Gardening and Landscape Architecture of the Late Humphry Repton*.^[6]

[John Claudius Loudon](#) was an established and influential [horticultural](#) journalist and Scottish landscape architect whose writings were instrumental in shaping [Victorian](#) taste in gardens, public parks, and [architecture](#).^[7] In the *Landscape Gardening and Landscape Architecture of the Late Humphry Repton*, [Loudon](#) describes two distinct styles of landscape gardening existing at the beginning of the 19th century: geometric and natural.^[6] [Loudon](#) wrote that each style reflected a different stage of society. The geometric style was “most striking and pleasing,” displaying wealth and taste in an “early state of society” and in “countries where the general scenery was wild, irregular, and natural, and man, comparatively, uncultivated and unrefined.”^[6] The natural style was used in “modern times” and in countries where “society is in a higher state of cultivation,” displaying wealth and taste through the sacrifice of profitable lands to make room for such designs.^[6]

The prominent English landscape designer [Humphry Repton](#) (1752-1818) echoed similar ideas in his work and design ideas. In his writings on the use of delineated spaces (e.g. [courtyards](#), [terrace walls](#), fences), [Repton](#) states that while the motive for defense no longer exists, the features are still useful in separating "the gardens, which belong to man, and the forest, or desert, which belongs to the wild denizens."^[6] [Repton](#) refers to Indigenous peoples as "uncivilized human beings, against whom some decided line of defense was absolutely necessary."^[6]

The practice of landscape architecture spread from the Old to the New World. The term "landscape architect" was used as a professional title by [Frederick Law Olmsted](#) in the United States in 1863^[citation needed] and [Andrew Jackson Downing](#), another early American [landscape designer](#), was editor of *The Horticulturist* magazine (1846–52). In 1841 his first book, *A Treatise on the Theory and Practice of Landscape Gardening, Adapted to North America*, was published to a

great success; it was the first book of its kind published in the United States.[8] During the latter 19th century, the term landscape architect began to be used by professional landscapes designers, and was firmly established after **Frederick Law Olmsted Jr.** and **Beatrix Jones (later Farrand)** with others founded the **American Society of Landscape Architects** (ASLA) in 1899. IFLA was founded at **Cambridge, England**, in 1948 with **Sir Geoffrey Jellicoe** as its first president, representing 15 countries from **Europe** and North America. Later, in 1978, IFLA's Headquarters were established in **Versailles**.^{[9][10][11]}

Fields of activity

[edit]

Royal Botanic Gardens, Kew, London, established 1759

The **Palm House, Kew**, built 1844–1848 by **Richard Turner** to **Decimus Burton**'s designs

Urban design in city squares. Water feature in London, by **Tadao Ando** who also works with landscapes and gardens

The variety of the professional tasks that landscape architects collaborate on is very broad, but some examples of project types include:^[12]

- Parks of general design and **public infrastructure**
- **Sustainable development**
- **Stormwater management** including **rain gardens**, **green roofs**, **groundwater recharge**, **green infrastructure**, and **constructed wetlands**.
- Landscape design for educational function and site design for public institutions and government facilities
- **Parks**, **botanical gardens**, **arboretums**, **greenways**, and **nature preserves**
- Recreation facilities, such as playgrounds, **golf courses**, **theme parks** and sports facilities
- Housing areas, industrial parks and commercial developments
- **Estate** and **residence landscape planning** and design

- Landscaping and accents on **highways**, transportation structures, **bridges**, and **transit corridors**
- Contributions to **urban design**, town and city squares, waterfronts, pedestrian schemes
- Natural park, tourist destination, and recreating historical landscapes, and **historic garden** appraisal and conservation studies
- **Reservoirs**, **dams**, **power stations**, reclamation of **extractive industry** applications or major industrial projects and **mitigation**
- **Environmental assessment** and **landscape assessment**, planning advice and land management proposals.
- Coastal and offshore developments and **mitigation**
- **Ecological design** (any aspect of design that minimizes environmentally destructive impacts by integrating itself with natural processes and **sustainability**)

Landscape managers use their knowledge of landscape processes to advise on the long-term care and development of the landscape. They often work in **forestry**, nature **conservation** and **agriculture**.^[citation needed]

Landscape scientists have specialist skills such as **soil science**, **hydrology**, **geomorphology** or **botany** that they relate to the practical problems of landscape work. Their projects can range from site surveys to the ecological assessment of broad areas for planning or management purposes. They may also report on the impact of development or the importance of particular **species** in a given area.^[citation needed]

Landscape planners are concerned with **landscape planning** for the location, scenic, **ecological** and recreational aspects of urban, rural, and coastal land use. Their work is embodied in written statements of policy and strategy, and their remit includes **master planning** for new developments, landscape evaluations and assessments, and preparing countryside management or policy plans. Some may also apply an additional specialism such as **landscape archaeology** or law to the process of landscape planning.^[citation needed]

Green roof (or more specifically, vegetative roof) designers design extensive and intensive **roof gardens** for **stormwater** management, evapo-transpirative cooling, **sustainable architecture**, aesthetics, and habitat creation.^[13]

Relation to urban planning

^[edit]

The combination of the traditional landscape gardening and the emerging city planning combined gave landscape architecture its unique focus. **Frederick Law Olmsted** used

the term 'landscape architecture' using the word as a profession for the first time when designing the **Central Park**.

Through the 19th century, **urban planning** became a focal point and central issue in cities. The combination of the tradition of **landscape gardening** and the emerging field of urban planning offered landscape architecture an opportunity to serve these needs.[14] In the second half of the century, **Frederick Law Olmsted** completed a series of parks that continue to have a significant influence on the practices of landscape architecture today. Among these were **Central Park** in **New York City**, **Prospect Park** in **Brooklyn, New York** and Boston's **Emerald Necklace** park system. **Jens Jensen** designed sophisticated and naturalistic urban and regional parks for **Chicago, Illinois**, and private estates for the Ford family including **Fair Lane** and **Gaukler Point**. One of the original eleven founding members of the **American Society of Landscape Architects** (ASLA), and the only woman, was **Beatrix Farrand**. She was design consultant for over a dozen universities including: **Princeton** in **Princeton, New Jersey**; **Yale** in **New Haven, Connecticut**; and the **Arnold Arboretum** for **Harvard** in **Boston, Massachusetts**. Her numerous private **estate** projects include the landmark **Dumbarton Oaks** in the **Georgetown** neighborhood of **Washington, D.C.**[15] Since that time, other architects – most notably Ruth Havey and Alden Hopkins – changed certain elements of the Farrand design.[citation needed]

Since this period urban planning has developed into a separate independent profession that has incorporated important contributions from other fields such as **civil engineering**, **architecture** and **public administration**. Urban Planners are qualified to perform tasks independent of landscape architects, and in general, the curriculum of landscape architecture programs do not prepare students to become urban planners.[16]

Landscape architecture continues to develop as a design discipline and to respond to the various movements in architecture and design throughout the 20th and 21st centuries. **Thomas Church** was a mid-century landscape architect significant in the profession. **Roberto Burle Marx** in **Brazil** combined the **International style** and native Brazilian plants and culture for a new aesthetic. Innovation continues today solving challenging problems with contemporary design solutions for **master planning**, landscapes, and **gardens**. [citation needed]

Ian McHarg was known for introducing environmental concerns in landscape architecture.[17][18] He popularized a system of analyzing the layers of a site in order to compile a complete understanding of the qualitative attributes of a place. This system became the foundation of today's **Geographic Information Systems (GIS)**. McHarg would give every qualitative aspect of the site a layer, such as the history, hydrology, topography, vegetation, etc. GIS software is ubiquitously used in the landscape architecture profession today to analyze materials in and on the Earth's surface and is similarly used by **urban planners**, **geographers**, **forestry** and natural resources professionals, etc.[citation needed]

European nations enabled the widespread circulation of urban planning strategies by transferring landscaping ideas and practices to overseas colonies. The **green belt** was a popular landscape practice exported by Britain onto colonial territories such as **Haifa** (1918-1948).[19] Spatial mechanisms like the green belt, implemented through the Haifa Bay Plan and the British "Grand Model," were used to enforce political control and civic order and extend western ideas of progress

and development.[19] The Greater London Regional Planning Committee accepted the **green belt** concept which formed the basis of the 1938 **Green Belt Act**. The planning **prototype** demarcated open spaces, distinguished between city and countryside, limited **urban growth**, and created **zoning divisions**. [19] It was used extensively in the British colonies to facilitate British rule through the organized division of landscape and populations. [19]

Relation to Indigenous practices

[edit]

Indigenous land management practices create constantly changing landscapes through the use of **vegetation** and natural systems, contrasting with western epistemologies of the discipline that separate ornament from function.[20] The discipline of landscape architecture favors western designs made from structured materials and geometric forms.[20] Landscape architecture history books tend to include projects that contain constructed architectural elements that persist over time, excluding many Indigenous landscape-based designs.[20]

Landscape architecture textbooks often place Indigenous peoples as a prefix to the official start of the discipline. The widely read landscape history text *The Landscape of Man* (1964) offers a global history of the designed landscape from past to present, featuring **African** and other Indigenous peoples in its discussions of **Paleolithic** man between 500,000 and 8,000 BCE in relation to **human migration**. [20] Indigenous land-management practices are described as archaeological rather than a part of contemporary practice. *Gardens in Time* (1980) also places Indigenous practice as prehistory at the beginning of the landscape architecture timeline. Authors **John** and Ray Oldham describe **Aborigines of Australia** as “survivors of an ancient way of life” who provide an opportunity to examine western Australia as a “meeting place of a prehistoric man.”[20]

In the late 18th century, the landscapes created by **aboriginal land and fire management practices** appealed to English settlers in **Australia**. [20] Journals from the period of early white settlement note the landscape resembling parks and popular designs in **English landscape gardens** of the same period. [20] In England, these designs were considered sophisticated and celebrated for the intentional sacrifice of usable land. In Australia, the park-like condition was used to justify British control, citing its emptiness and lack of productive use as a basis for the dispossession of Aboriginal people. [20]

Education

[edit]

Landscape Architects are generally required to have university or graduate education from an accredited landscape architecture degree program, which can vary in length and degree title. They learn how to create projects from scratch, such as **residential** or **commercial** planting and designing outdoor living spaces [21] they are willing to work with others to get a better outcome for the customers when doing a project; they will have to learn the basics of how to create a project on a manner of time and will require to get your license in a certain state to be allowed to work; students of Landscape Architects will learn how to interact with clients and will learn how to explain

a design from scratch when giving the final project.[22]

Landscape architecture has been taught in the [University of Manchester](#) since the 1950s. The course in the [Manchester School of Architecture](#) enables students to gain various bachelor's and master's degrees, including MLPM(Hons) which is accredited by the [Landscape Institute](#) and by the [Royal Town Planning Institute](#).[23]

Profession

[[edit](#)]

Main article: [Landscape architect](#)

In many countries, a professional [institute](#), comprising members of the professional community, exists in order to protect the standing of the profession and promote its interests, and sometimes also regulate the practice of landscape architecture. The standard and strength of legal regulations governing landscape architecture practice varies from nation to nation, with some requiring licensure in order to practice; and some having little or no regulation. In [Europe](#), [North America](#), parts of [South America](#), [Australia](#), [India](#), and [New Zealand](#), landscape architecture is a regulated profession.[24]

Argentina

[[edit](#)]

Since 1889, with the arrival of the French architect and urbanist landscaper [Carlos Thays](#), recommended to recreate the National Capital's parks and public gardens, it was consolidated an apprentice and training program in landscaping that eventually became a regulated profession, currently the leading academic institution is the [UBA University of Buenos Aires](#)"*UBA Facultad de Arquitectura, Diseño y Urbanismo*" (Faculty of Architecture, Design and Urbanism) offering a Bachelor's degree in Urban Landscaping Design and Planning, the profession itself is regulated by the National Ministry of Urban Planning of Argentina and the Institute of the [Buenos Aires Botanical Garden](#).^{[*[citation needed](#)*]}

Australia

[[edit](#)]

The [Australian Institute of Landscape Architects](#) (AILA) provides accreditation of university degrees and non-statutory professional registration for landscape architects. Once recognized by AILA, landscape architects use the title 'Registered Landscape Architect' across the six states and territories within Australia.^{[*[citation needed](#)*]}

AILA's system of professional recognition is a national system overseen by the AILA National Office in Canberra. To apply for AILA Registration, an applicant usually needs to satisfy a number of pre-requisites, including university qualification, a minimum number years of practice and a

record of professional experience.^[25]

Landscape Architecture within Australia covers a broad spectrum of planning, design, management, and research. From specialist design services for government and private sector developments through to specialist professional advice as an expert witness.^[citation needed]

Canada

^[edit]

In Canada, landscape architecture, like law and medicine, is a self-regulating profession pursuant to provincial statute. For example, Ontario's profession is governed by the Ontario Association of Landscape Architects pursuant to the *Ontario Association of Landscape Architects Act*. Landscape architects in Ontario, British Columbia, and Alberta must complete the specified components of L.A.R.E (Landscape Architecture Registration Examination) as a prerequisite to full professional standing.

Provincial regulatory bodies are members of a national organization, the **Canadian Society of Landscape Architects / L'Association des Architectes Paysagistes du Canada** (CSLA-AAPC), and individual membership in the CSLA-AAPC is obtained through joining one of the provincial or territorial components.^[26]

Indonesia

^[edit]

ISLA (Indonesia Society of Landscape Architects) is the Indonesian society for professional landscape architects formed on 4 February 1978 and is a member of IFLA APR and IFLA World. The main aim is to increase the dignity of the professional members of landscape architects by increasing their activity role in community service, national and international development. The management of IALI consists of National Administrators who are supported by 20 Regional Administrators (Provincial level) and 3 Branch Managers at city level throughout Indonesia.^[citation needed]

Landscape architecture education in Indonesia was held in 18 universities, which graduated D3, Bachelor and Magister graduates. The landscape architecture education incorporate in Association of Indonesian Landscape Architecture Education.^[citation needed]

Italy

^[edit]

This section does not cite any sources. Please help **improve this section** by **adding citations to reliable sources**. Unsourced material may be challenged and **removed**. (January 2021) (*Learn how and when to remove this message*)

AIAPP (Associazione Italiana Architettura del Paesaggio) is the Italian association of professional landscape architects formed in 1950 and is a member of IFLA and IFLA Europe (formerly known as EFLA). AIAPP is in the process of contesting this new law which has given the Architects' Association the new title of Architects, Landscape Architects, Planners and Conservationists whether or not they have had any training or experience in any of these fields other than Architecture. In Italy, there are several different professions involved in landscape architecture:

- Architects
- Landscape designers
- Doctor landscape agronomists and Doctor landscape foresters, often called Landscape agronomists.
- Agrarian Experts and Graduated Agrarian experts.

New Zealand

[[edit](#)]

The [New Zealand Institute of Landscape Architects](#) (NZILA) is the professional body for Landscape Architects in NZ.^[27]

In April 2013, NZILA jointly with AILA, hosted the 50th International Federation of Landscape Architects (IFLA) World Congress in Auckland, New Zealand. The World Congress is an international conference where Landscape Architects from all around the globe meet to share ideas around a particular topic.^{[[citation needed](#)]}

Within NZ, Members of NZILA when they achieve their professional standing, can use the title Registered Landscape Architect NZILA.^{[[citation needed](#)]}

NZILA provides an education policy and an accreditation process to review education programme providers; currently there are three accredited undergraduate Landscape Architecture programmes in New Zealand. Lincoln University also has an accredited masters programme in landscape architecture.^{[[citation needed](#)]}

Norway

[[edit](#)]

Landscape architecture in Norway was established in 1919 at the Norwegian University of Life Sciences (NMBU) at Ås. The Norwegian School of Landscape Architecture at the Faculty of Landscape and Society is responsible for Europe's oldest landscape architecture education on an academic level. The departments areas include design and design of cities and places, garden art history, landscape engineering, greenery, zone planning, site development, place making and place keeping.^{[[citation needed](#)]}

South Africa

[edit]

In May 1962, [Joane Pim](#), Ann Sutton, Peter Leutscher and Roelf Botha (considered the forefathers of the profession in South Africa) established the Institute for Landscape Architects, now known as the Institute for Landscape Architecture in South Africa (ILASA).^[28] ILASA is a voluntary organisation registered with the South African Council for the Landscape Architectural Profession (SACLAP).^[29] It consists of three regional bodies, namely, Gauteng, KwaZulu-Natal and the Western Cape. ILASA's mission is to advance the profession of landscape architecture and uphold high standards of professional service to its members, and to represent the profession of landscape architecture in any matter which may affect the interests of the members of the institute. ILASA holds the country's membership with The [International Federation of Landscape Architects](#) (IFLA).^[30]

In South Africa, the profession is regulated by SACLAP, established as a statutory council in terms of Section 2 of the South African Council for the Landscape Architectural Profession Act – Act 45 of 2000. The Council evolved out of the Board of Control for Landscape Architects (BOCLASA), which functioned under the Council of Architects in terms of The Architectural Act, Act 73 of 1970. SACLAP's mission is to establish, direct, sustain and ensure a high level of professional responsibilities and ethical conduct within the art and science of landscape architecture with honesty, dignity and integrity in the broad interest of public health, safety and welfare of the community.^[citation needed]

After completion of an accredited under-graduate and/or post-graduate qualification in landscape architecture at either the [University of Cape Town](#) or the [University of Pretoria](#), or landscape technology at the [Cape Peninsula University of Technology](#), professional registration is attained via a mandatory mentored candidacy period (minimum of two years) and sitting of the professional registration exam. After successfully completing the exam, the individual is entitled to the status of Professional Landscape Architect or Professional Landscape Technologist.^[citation needed]

Sweden

[edit]

Architects Sweden, Sveriges Arkitekter, is the collective trade union and professional organisation for all architects, including landscape architects, in Sweden. The professional body is a member of IFLA ([International Federation of Landscape Architects](#)) as well as IFLA Europe.

As a landscape architect, anyone can become a member of Architects Sweden if they have a national or international university degree that is approved by the association. If the degree is from within the European Union, Architects Sweden approves Landscape architect educations listed by [IFLA Europe](#). For educations outside the EU, the association makes an assessment on a statement from the [Swedish Council for Higher Education](#) (UHR).

United Kingdom

[[edit](#)]

The UK's professional body is the [Landscape Institute](#) (LI). It is a [chartered](#) body that accredits landscape professionals and university courses. At present there are fifteen accredited programmes in the UK. Membership of the LI is available to students, academics and professionals, and there are over 3,000 professionally qualified members.^{[[citation needed](#)]}

The Institute provides services to assist members including support and promotion of the work of landscape architects; information and guidance to the public and industry about the specific expertise offered by those in the profession; and training and educational advice to students and professionals looking to build upon their experience.^{[[citation needed](#)]}

In 2008, the LI launched a major recruitment drive entitled "I want to be a Landscape Architect" to encourage the study of Landscape Architecture. The campaign aimed to raise the profile of landscape architecture and highlight its valuable role in building [sustainable communities](#) and fighting [climate change](#).^[31]

As of July 2018, the "I want to be a Landscape Architect" initiative was replaced by a brand new careers campaign entitled [#ChooseLandscape](#), which aims to raise awareness of landscape as a profession; improve and increase access to landscape education; and inspire young people to choose landscape as a career.^[32] This new campaign includes other landscape-related professions such as landscape management, landscape planning, landscape science and urban design.^[33]

United States

[[edit](#)]

The [National Mall](#) in [Washington, D.C.](#) includes many examples of landscape architecture based on historical memorials and monuments.

In the United States, landscape architecture is regulated by individual state governments. For a landscape architect, obtaining licensure requires advanced education and work experience, plus passage of the national examination called the Landscape Architect Registration Examination (L.A.R.E.). Licensing is overseen at the national level by the Council of Landscape Architectural

Reviews for Rock N Block - Turf N Hardscapes

Terry lewis

(5)

Workers were great, no problem they did what was required, but the representative of your company mislead me on what was to be done, I showed pictures from a competitor landscaper, representative stated he could bet there , , . price, but since it wasn't in contract, I was left with uncomplicated backyard , working with owner at present, so he's been outstanding working on this situation, as amount of rock was way off and the owner did increase the amount substantially to finish the front yard. another landscaper under contract to finish the backyard. Would like to add a comment the manger/owner of Las Vegas yard n block stands behind his words and helped me tremendously on finishing up the backyard,

Josh Bodell

(5)

Eric and team did an amazing job. They worked with me for months while I got HOA approval for the project. Once they began working they were great, going over everything in detail and making sure things were perfect. This project included wall repair, stucco and paint repair, paver and turf installation. Extremely satisfied with this experience.

Shana Shapiro

(5)

Chris, the design consultant, Dave the production manager, along with their install team Opulent were affordable, upfront with costs, efficient and professional. Attached are some before and after pictures. Highly recommend their services.

Dawna OgleYohe

(5)

My initial contact was with Ray, whom did an excellent job giving me an estimate on what I wanted done in my small yard and walkway., the guys that came out and did the work were superior. They did an excellent job. I'm very pleased with this company. I will highly recommend them to family and friends, and I will be using them in the near future for other little projects.

Reviews for Rock N Block - Turf N Hardscapes

D. Lopez

(5)

We recently had a very positive experience with Rock N Block for our fence replacement. The entire process went smoothly and exceeded our expectations. Harvey and his team were incredibly professional and communicative throughout the project providing much-needed assurance and peace of mind. The crew was punctual and maintained a diligent and respectful attitude that made the experience pleasant. The crew finished the project ahead of schedule, and the quality of their work is impressive; our new wall looks great! We recommend Rock N Block for any fencing needs and look forward to working with them again. Thank you, Harvey and crew, for a job well done!

My initial contact was with Ray, whom did an excellent job giving me an estimate on what I wanted done in my small yard and walkway., the guys that came out and did the work were superior. They did an excellent job. I'm very pleased with this company. I will highly recommend them to family and friends, and I will be using them in the near future for other little projects.

Eric and team did an amazing job. They worked with me for months while I got HOA approval for the project. Once they began working they were great, going over everything in detail and making sure things were perfect. This project included wall repair, stucco and paint repair, paver and turf installation. Extremely satisfied with this experience.

Frequently Asked Questions

What makes Las Vegas landscaping different from other regions?

Las Vegas landscaping is shaped by the Mojave Desert's extreme climate, with scorching summer heat and minimal rainfall. Traditional lawns demand high water usage, so residents often use xeriscaping techniques that require little irrigation. Designers focus on selecting

native or desert-adapted plants—such as succulents, cacti, and ornamental grasses—and pairing them with gravel, boulders, and rock mulch. This approach not only conserves water but also cuts down on labor-intensive maintenance. Additionally, many yards incorporate shade structures, drip irrigation systems, and nighttime lighting to boost usability after sunset. Together, these elements create low-water, visually appealing outdoor spaces that celebrate Las Vegas' desert character.

In which locations does Rock N Block operate?

They operate in Las Vegas, NV; San Diego, CA; Denver, CO; and Utah.

Which outdoor features can a Las Vegas landscaping designer add to my yard?

A skilled designer can incorporate a variety of features that suit desert living. Paver patios or stamped concrete decks handle intense heat and offer comfortable gathering spots. Shade structures, like pergolas or sail canopies, keep daytime temperatures more bearable. Fire pits and seating walls turn cool evenings into social retreats. Decorative rock beds highlight succulents or cacti, adding texture and a modern edge. Small water features—like bubblers or pondless fountains—introduce soothing sounds while reusing water. Low-voltage lighting extends outdoor enjoyment after sunset. The designer tailors each element to your preferences, climate constraints, and overall aesthetic for a balanced, livable yard.

How does Rock N Block ensure quality in artificial grass installation?

They follow a meticulous process, including site preparation, proper base construction, and use of high-quality materials to ensure a durable and aesthetically pleasing result.

What is xeriscaping, and why is it popular in Las Vegas?

Xeriscaping involves designing landscapes that demand minimal water, making it an ideal approach in desert cities like Las Vegas. By favoring native or drought-tolerant plants, gravel-based groundcovers, and drip irrigation, xeriscapes thrive under intense sun with reduced upkeep. This method often replaces large, thirsty lawns, cutting back substantially on irrigation and maintenance costs. Beyond practicality, xeriscapes can be quite striking—mixing textures of succulents, cacti, and rock accents for visual intrigue. Local water authorities frequently offer rebates for removing turf in favor of xeriscape. Ultimately, the popularity arises from combining **water conservation**, aesthetic charm, and simpler routine care, perfectly matching Las Vegas' arid environment.
