About backyard

For other uses, see [Backyard \(disambiguation\)](#).

Look up ***backyard*** or ***back yard*** in Wiktionary, the free dictionary.

The examples and perspective in this article **may not represent a worldwide view of the subject**. You may [improve this article](#), discuss the issue on the [talk page](#), or [create a new article](#), as appropriate. *(January 2025)* ([Learn how and when to remove this message](#))

A back yard in [Brisbane, Queensland, Australia](#), in 1929

The back garden of [Iford Manor](#) was designed by [Harold Peto](#).

A **backyard**, or **back yard** (known in the United Kingdom as a **back garden** or just **garden**), is a **yard** at the back of a **house**, common in suburban developments in the Western world.^[1]

It is typically **residential garden** located at the rear of a property, on the other side of the **house** from the **front yard**. While Western gardens are almost universally based on plants, the "garden" (which etymologically may imply a shorthand of **botanical garden**) may use plants sparsely or not at all. Hence, the terms *yard* and *garden* are for the context of this article interchangeable in most cases.

History

[\[edit\]](#)

United Kingdom

[\[edit\]](#)

In English [suburban](#) and [gardening](#) culture, back gardens have a special place.[\[2\]](#) In [Britain](#) there are over 10 million back gardens.[\[3\]](#) British planning require minimum distances between the rear faces of adjacent dwellings and so there is usually space for a back garden of some sort. In other countries, such as Australia, this does not apply and preference for buildings with a large footprint has tended to squeeze out the space at the rear.[\[4\]](#)

Australia

[\[edit\]](#)

In Australia, until the mid-20th century, the back yard of a property would traditionally contain a [fowl run](#), outhouse ("[dunny](#)"), [vegetable patch](#), and [woodheap](#). More recently, these have been replaced by outdoor entertainments such as a [barbecue](#) and [swimming pool](#).[\[5\]](#) But, since the 1990s, the trend in Australian suburban development has been for back yards to disappear as the dwellings now occupy almost all of the building plot.[\[1\]](#)

In higher latitudes, it is economical in low [land value](#) regions to use open land surrounding a house for [vegetable gardening](#) during summers and allow sunlight to enter house windows from a low horizon angle during winters. As land value increases, houses are built nearer to each other. In order to preserve some of the open land, house owners may choose to allow construction on the side land of their houses, but not build in front of or behind their house in order to preserve some remnants of open surrounding land. The back area is known as the backyard or [back garden](#).

Overview

[\[edit\]](#)

A back garden arises when the main building divides the surrounding gardens into two. This happens especially in the high density housing of British cities and towns. A [semi-detached house](#) typical of the British suburbs of the 20th century will have front gardens which face the road and provide access. The back gardens in such cases will be more secluded and access will typically be via the dwelling or by a path around the side. A front garden is a formal and semi-public space and so subject to the constraints of convention and law. However, the back garden is more private and casual,[\[6\]](#) and so can be put to more purposes.

If the housing is **terraced**, then no side path is possible and access may be provided by an alley which runs behind the rear of the terrace. While buildings opening directly onto a street may not have a front garden, most will have some space at the back, however small; the exception being **back-to-back houses** found in northern industrial towns in England such as **Leeds**, but now mostly demolished. A private back yard with a "privy" (toilet) was a defining feature of the **byelaw terraced house**, a type of dwelling built to comply with the **Public Health Act 1875**.

Usage

[**edit**]

Because of weather constraints, it is usual to use a garden more in the summer than in the winter, although some usages are traditional, such as for a bonfire on **Bonfire Night**, 5 November. Similarly, **daytime** usage is more common than nighttime.

The back garden of the **archdeacon of Canterbury** contains a **mulberry** which is said to have been planted by **Erasmus**.

Functionally, it may be used for:

- Growing food[3]
- Playing games
- Relaxing and **sunbathing**
- Raising plants
- Housing pets
- Drying clothes
- Making a **compost heap**
- Hobbies
- Locating a **greenhouse**, **conservatory**, **shed**, **workshop**, **outhouse**, or **garage** (if access to a **road** is possible)
- **Partying**
- **Wildlife refuge**
- Safe area for children
- Location of an **air raid shelter** such as the **Anderson shelter** of World War II[7]

In fact, its functional and **recreational** use is so varied, that it cannot be easily categorised. Many of the freedoms of the use of the back garden come from the restrictions, social or legal of what are not done in the front.

Usually, clothes are not dried, vegetables are not grown, and sunbathing is not carried out in a front garden. All these can happen in the privacy of the back garden.

Traditionally, people treat a back garden as private to themselves, and not those they are neighbours to. The social etiquette of how one can greet and interact one's neighbours may be complex and defined by many informal social rules.

In some areas, talking to one's neighbours over the back wall (the side wall following the property boundary line) is usual, and is a welcome form of neighbourliness, while in other places it is not.

The third method is to put a **carpet** or mat with woven or tufted fibres on the surface, then to brush in sand or sand mixes to keep the fibres in an upright position and finally to seed grass mixtures on top. The natural grass roots through the mat and stabilizes the system. These systems are called carpet-based hybrid grass solutions. [12]

Reviews for Rock N Block - Turf N Hardscapes

image not found or type unknown

Terry lewis

(5)

Workers were great, no problem they did what was required, but the representative of your company mislead me on what was to be done, I showed pictures from a competitor landscaper, representative stated he could bet there , . . price, but since it wasn't in contract, I was left with uncomplicated backyard , working with owner at present, so he's been outstanding working on this situation, as amount of rock was way off and the owner did increase the amount substantially to finish the front yard. another landscaper under contract to finish the backyard. Would like to add a comment the manger/owner of Las Vegas yard n block stands behind his words and helped me tremendously on finishing up the backyard,

Josh Bodell

(5)

Eric and team did an amazing job. They worked with me for months while I got HOA approval for the project. Once they began working they were great, going over everything in detail and making sure things were perfect. This project included wall repair, stucco and paint repair, paver and turf installation. Extremely satisfied with this experience.

Shana Shapiro

(5)

Chris, the design consultant, Dave the production manager, along with their install team Opulent were affordable, upfront with costs, efficient and professional. Attached are some before and after pictures. Highly recommend their services.

Image not found or type unknown

Dawna OgleYohe

(5)

My initial contact was with Ray, whom did an excellent job giving me an estimate on what I wanted done in my small yard and walkway., the guys that came out and did the work were superior. They did an excellent job. I'm very pleased with this company. I will highly recommend them to family and friends, and I will be using them in the near future for other little projects.

Reviews for Rock N Block - Turf N Hardscapes

D. Lopez

(5)

We recently had a very positive experience with Rock N Block for our fence replacement. The entire process went smoothly and exceeded our expectations. Harvey and his team were incredibly professional and communicative throughout the project providing much-needed assurance and peace of mind. The crew was punctual and maintained a diligent and respectful attitude that made the experience pleasant. The crew finished the project ahead of schedule, and the quality of their work is impressive; our new wall looks great! We recommend Rock N Block for any fencing needs and look forward to working with them again. Thank you, Harvey and crew, for a job well done!

Workers were great, no problem they did what was required, but the representative of your company mislead me on what was to be done, I showed pictures from a competitor landscaper, representative stated he could bet there , , . price, but since it wasn't in contract, I was left with uncomplicated backyard , working with owner at present, so he's been outstanding working on this situation, as amount of rock was way off and the owner did increase the amount substantially to finish the front yard. another landscaper under contract to finish the backyard. Would like to add a comment the manger/owner of Las Vegas yard n block stands behind his words and helped me tremendously on finishing up the backyard,

My initial contact was with Ray, whom did an excellent job giving me an estimate on what I wanted done in my small yard and walkway., the guys that came out and did the work were superior. They did an excellent job. I'm very pleased with

this company. I will highly recommend them to family and friends, and I will be using them in the near future for other little projects.

Eric and team did an amazing job. They worked with me for months while I got HOA approval for the project. Once they began working they were great, going over everything in detail and making sure things were perfect. This project included wall repair, stucco and paint repair, paver and turf installation. Extremely satisfied with this experience.

Frequently Asked Questions

What are the benefits of installing artificial grass?

Artificial grass provides a lush, green lawn year-round with minimal maintenance, reduces water usage, and is durable under various weather conditions.

What are the benefits of artificial turf in Las Vegas landscapes?

Artificial turf saves precious water, cuts down on fertilizer or pesticide use, and requires no mowing—ideal in a desert city. It stays green year-round despite scorching summer highs. Many modern turf products feature realistic textures that mimic natural grass, making them family- and pet-friendly. With proper installation—like ensuring efficient drainage and a smooth sub-base—synthetic lawns can last years with minimal upkeep. Pairing artificial turf with surrounding gravel or drought-tolerant plants creates visual contrast and reduces the “heat island” effect. While initial costs may be higher, homeowners often recoup that investment quickly by slashing water bills and maintenance routines.

What services does Rock N Block Turf N Hardscapes offer?

Rock N Block provides comprehensive solutions including artificial turf supply and installation, hardscaping services, paver installation, retaining walls, outdoor living spaces, and more.

How do I choose the right landscaping designer in Las Vegas?

Begin by checking portfolios to see if a designer's style resonates with you—some focus on modern rockscapes, while others excel in lush desert gardens. Ask for references and read online reviews from past clients. Confirm they understand desert-friendly concepts like drip irrigation, suitable plant species, and local water restrictions. It's helpful if they have experience navigating HOA rules or city permits. Request detailed estimates outlining costs for plants, irrigation, and labor. A trustworthy designer will listen to your needs—like budget constraints or favorite colors—and propose feasible solutions. Look for open communication and transparent timelines, ensuring a smooth path from initial concept to a vibrant, low-water yard.

How can I conserve water while keeping my yard attractive in Las Vegas?

Start by practicing **xeriscaping**—selecting native or desert-friendly plants, then organizing them into zones based on watering demands. Swap water-heavy turf for artificial grass or decorative rock and limit any remaining lawn areas to spaces you truly use. Install drip irrigation lines to deliver moisture directly to roots, minimizing evaporation. Add mulch or gravel around plants to help the soil retain water. Smart irrigation controllers detect weather changes and adjust schedules automatically, avoiding wasted runoff. Lastly, consider strategic shade via pergolas or drought-tolerant trees to reduce heat stress on plants. These measures collectively maintain a vibrant look with far less water.
